

See what the driver sees.

Watch your drivers in real-time, and view recorded speeding and other behavior moments. Our vehicle cameras bring a new level of transparency and protection to your drivers, managers, and bottom-line.

Live Streaming

The availability of live streaming footage encourages drivers to be more responsible, and keeps them from engaging in bad or mistaken behavior.

Event Based Recording

Video clips are automatically saved for later viewing when a driver drives too fast, accelerates or decelerates too quickly, turns too harshly, and more.

Video Downloads

Stream historical footage from a specific date and time and download the video clips to your computer.

Multi-Camera Views

FleetCam supports up to 4 cameras per vehicle. A dome cam facing the driver, a road cam mounted to the windshield, and two waterproof cams mounted on the left and right sides of the vehicle.

720p HD Resolution

High resolution live streams and recordings for a crystal clear image.

1TB Hard Drive

Store approximately 134 hours of HD video on the included 1TB hard drive.

Waterproof Exterior Cams

Exterior side cams are dust-tight and waterproof with an IP67 rating.

Backup Recordings

Video is automatically backed up onto the included 32GB SD card.

Driver Cam Audio

Audio feed is available from the dome cam, typically facing drivers or passengers.

Night Vision

Infrared sensors on the dome cam and side cams allow recording in total darkness.

Anti-Tamper Lock

Locking case prevents anyone from compromising the recordings.

Hard-Wired Power

Provides automated operation and additional tamper resistance.
